

Countertops

A dealer for two fantastic fabricators - Blue Isle Granite & Tile AND Points Countertop, Inc.

Heritage Cabinet Supply offers a spectrum of products - granite, marble, quartz - Silestone™ with MicrobanR, Corian™, Concrete and, LG Hi Macs™ acrylic solid surface, butcher block and laminates from Wilsonart™ and Formica™. Any style and any color are available to you with nothing but the best in design, manufacture and installation of your final piece of art.

Here's a little information about each of our lines: GRANITE and MARBLE

Because granite and marble are natural stones, extreme attention to detail and perfectionism is required by only the most skilled workers in the field. All of the work from my granite and marble fabricator - Blue Isle Granite and Tile - is done "in-house" and, therefore, not subcontracted. Blue Isle and Heritage Cabinet Supply are committed to excellence! Headed by a third-generation stone cutter, Blue Isle fabricates the most beautiful lines in stone - period.

We can get you anything from Ubatuba to the most exotic granite you can find. Imported from around the globe, we have access to over 300 stones! If it is out there, we can get it and fabricate it to meet your every need and desire. We work through local stone distributors where you - the customer - can go browse and choose the very stone that will be cut and shined, as your design dictates.

OUR GRANITE IS TOP-OF-THE-LINE

In short, you are buying the best quality stone from around the world. Many companies advertise a low price per square foot (SF), but then add a LOT of charges that really are not necessary.

Watch out for "Contractor Grade" Stone

When stone is quarried, some slabs are perfect; the remainder are not. The imperfect slabs typically have small "issues" that compromise the structural integrity of the stone, such as hairline cracks and/or fissures. Slabs that are of this poor quality are typically left over at the quarry until all of the good slabs are sold to the high-end stone distributors. Those leftover, imperfect slabs of stone, are bought up by distributors in China at extremely low prices.

This lower quality stone is then sold to smaller fabricators who in turn advertise their "great" prices. These fabricators make money and the consumer seemingly saves money - BUT they will have many issues down the line with their stone countertops. Those imperfect slabs are usually covered with a WAX SEALANT so that the imperfections are hidden. The purchaser won't notice any of the problems when they view the stone (IF they view the stone) at the fabricator's location. This wax sealant will wear away in time leaving exposed the porous areas of the lesser quality stone. This stone typically needs to be re-sealed every couple of months! Additionally, this less-than-optimal stone can chip easier than the denser, higher quality, stone slabs.

As a fabricator, Blue Isle Granite and Tile pays a little more for our stone, but they purchase only from the best, most renowned distributor - such as Europa Stone in Sterling, Virginia. So while it is a bit more in terms of initial costs, there are less headaches and problems for the customer who buys through Heritage Cabinet Supply. Our customers get the TOP PICKS from the quarries and the best fabrication from a third-generation stone cutter!

The story of many small granite fabricators

A couple years ago, a LOT of independent (small) granite fabricators popped up trying to capitalize on the booming housing market in Virginia, Maryland, Washington, D.C. and West Virginia. Since the 2006 / 2007 housing slump, many of those fabricators understandably are trying to hold on for dear life to avoid going out of business. Most subcontract their fabricators and installers, so they don't actually have any "in-house" employees. Some even work out of their garages with hand saws instead of investing in top-quality machinery, as do reputable granite companies.

We stand behind our stone sold to you through Heritage Cabinet Supply. Blue Isle Granite and Tile - while small - is top in its class and Heritage Cabinet Supply is proud to carry and promote their extraordinary services.

ENGINEERED SOLID SURFACES

SileStone™ with MicrobanR (Quartz) - Cosentino

'Sophisticated,' 'Elegant,' 'Timeless,' and 'Beautiful' - these are the words that are used to describe SileStone™. It can be used for virtually any surface in the home - kitchens, bathrooms and floors, including: countertops, island tops, vanities, tub and shower surrounds, backsplashes, walls, wet bars, tabletops, desktops, fireplace surrounds and more!

Being resistant to scratches, stains and scorching, SileStone™ is a great alternative to laminates and wood for the busy work surface. Although durable, SileStone™ is not scratch-proof; it can be damaged with excessive force and/or pressure.

Please know that nothing we at Heritage Cabinet Supply are aware of is 100 percent stain-resistant and we will never make a claim otherwise (unless backed by the manufacturer and is proven technology!).

SileStone™ with MicrobanR offers a fantastic combination of anti-microbial protection and innovation. It is the first and only countertop in the industry with built-in MicrobanR anti-microbial product protection to safely fight the growth of odor-causing bacteria, mold and mildew on the product surface for the life of the product. The result is peace of mind with countertops that are easier to clean and actually stay sanitary between cleanings because of the surface's ability to fight bacteria, mold and mildew!

SileStone™ offers the following: predictable color consistency from sample to slab, the most colors in natural quartz, most innovative sink installation methods, such as integrated, flush and bevel-mounted; and the latest, newest products such as the exclusive SileStone Leather™.

Concrete

Custom Concrete Design Studio Inc. offers truly custom tops for any application you have. Owned and operated by a family with three generations of concrete experience, this company can create the perfect custom top for you. The only thing that may limit their capabilities is one's imagination. Versatility, uniqueness, boundless color choices, designs that can be as detailed as you want, concrete allows you to bring that special touch to any project both indoors and outside.

Of course, concrete is environmentally friendly. If you want recycled glass in your project, Custom Concrete Design Studio can make it for you. If you want to use your child's marbles for a special design for, say, your guest bathroom, that is easily done. Again, the possibilities are virtually endless.

WOOD COUNTER TOPS

Working with some of the best wood top fabricators on the East Coast, Heritage Cabinet Supply provides only the highest quality tops that are built to your specifications. Simply inquire within and we will provide quotes for your specific needs.
