

Heritage Cabinet Supply Design Services

Need help in kitchen and / or bathroom design? We can help! Our experienced group of creative individuals will help you come up with a design that will work for you and be one that you will enjoy for many years to come.

We like to have a full discussion with you about how you intend to utilize the new or remodel area. The bottom line is that we don't tell you what you need to include in your design; we do, however, make suggestions based on your desires and stated needs. After all, you are the one who is going to live with the final design!

We don't try up-selling at every corner as some have told me they experienced with other companies.

Here's what you can expect: an on-site visit where we take measurements; a lot of pictures (for the "before" pics!) that will help us develop a design from what you currently have; an interview-like discussion of what you like and don't like about your current design; and, e-mail / fax renderings of what your kitchen will look like in various ways. If you are looking to start designing right now, you can download and print out our free graph paper and start sketching out your design right now!

In short, please help us help you! (Yes, we attribute that line to Jerry Maguire, but it is true.) We can and will find your solution. So, give us a call or e-mail us. We look forward to working with you.
